### [General Information and datasheet \(EuroPharma\)](#)

#### Overcomes Chronic Pain

"I'm so excited about your new natural painkiller, Curamin. I've had constant pain for so many years that I can't even remember when it started. I was taking 12 Aleve and one Vicodin every day and still had pain. I started Curamin, and within 45 minutes after taking two capsules, all my pain was gone. I just had both feet operated on, and my doctor was amazed that my feet did not show any inflammation and that I had no pain from the operation. He suggested that I take a prescription painkiller, but I refused and relied on Curamin and had no pain. Please, please don't ever go out of business or retire. I could never live without Curamin." —Lucille R., De Pere, Wisconsin

#### Alleviates Hip Pain

"I have bursitis in my hip, and the pain was unbearable. I started taking [Curamin] this Friday afternoon, and by the evening I was feeling so much better and actually got a good night's sleep." —Helen C., Leipsic, Ohio

#### 'Awesome'

"I received and tried the curcumin; it worked awesomely. I couldn't believe the results. Thanks again." —Jim W., Green Bay, Wisconsin

#### Helps Migraine

Sufferer "My mother uses this and loves it. I tried some when I was at her house the other day, and it took my migraine away within 30 minutes." —Dawn K., Appleton, Wisconsin

#### Curamin Ingredients

Curamin's all natural ingredients include: Curcumin, curcuminoids, dl phenylalanine, Boswellia and Nattokinase.

Inflammation causes an immune response that can affect ones health if left

unchecked. Recently, researchers have discovered that by combining natural supplements into one formula, inflammation can be reduced and controlled naturally with the use of drugs.

Many herbs on the market have demonstrated anti-inflammatory properties, but Turmeric and Boswellia have the greatest affect on the body to promote a healthy inflammation response. Researchers have been studying turmeric for years trying to figure out why it works so well as an anti-inflammatory. They discovered Curcuminoid's the active compound in turmeric does all the anti-inflammatory work. Herbal Formulas standardized to Curcuminoid like curamin are 100 times as potent as the average Turmeric herb itself. When combined with DLPA (dl Phenylalanine) and Boswellia, 95% of the people who use the formula experience relief.

In the health food industry, Curcumin needs little introduction. There are hundreds of excellent studies that explain the wonders of this herb. A well known research team has isolated a curcuminoid that is the best COX2 inhibitor and can be used without risk of side effects. Curcuminoids are tiny sub-particles which make up Curcumin. Researchers have selected a very specific curcuminoid and then concentrated it 100 times and combined it with regular Curcumin for a very powerful anti-inflammatory effect.

Researchers have also discovered that curcuminoid in turmeric is the best herbal COX2 inhibitor with out the risk of side effects. Scientists in the past 5 years came out with prescription COX2 inhibitors, synthetic drugs that over time caused serious health issues with the individuals who took them. Now there is an alternative, curamin with curcuminoids that can do the same job with zero side effects.

Boswellia and DLPA individually do not perform as well as when combined with turmeric. Boswellia is a very powerful anti-inflammatory that works on the same order as curcuminoids from turmeric. DLPA is an amino acid that helps the body release serotonin. Serotonin is primarily found in the brain, and helps a person feel better and have a more positive out look on life. With pain management, a positive attitude is always important no matter who bad one may feel.

Nattokinase is from fermented Soy, which has recently been discovered to help the body strip unwanted buildup in the veins. Sort of like a natural chelation, nattokinase helps with blood flow and the body's natural cleansing process. Excess buildup on the blood vessel walls can cause inflammation which tells the immune system to react. Restoring the immune system to normal is critical for one looking to ease pain and live a normal life pain free.

Give Curamin A Try!

Curamin (anti-inflammatory formula) End Pain Now

Recommended Use: Adults: 2 capsules twice daily or as directed by your health care professional.

If pregnant or nursing, consult a health care practitioner.

This product enhances the body's natural defense mechanisms for the relief of inflammation and pain due to overuse.

Guaranteed satisfaction. Use as needed. If pain persists, take 2 – 3 capsules every eight hours, not to exceed more than eight capsules per day.
