General Information and datasheet (HOLISTIC HORIZONS)

Description: **

Intestinal Bulking Agent III with improved taste, contains Inulin, a prebiotic soluble fiber that aids, enhances, and feeds the lactobacilli and bifido bacteria. Also provides the lubrication and absorptive effects needed to sweep loosened mucoid matter from the system. (2+ bottles required for each month of cleansing). Intestinal Bulking Agent III is our most recent significant breakthrough for maintaining a healthy population of lactobacteria in the intestinal tract while cleansing the entire digestive system. It is brought to you by the developer and originator of the world's first and still the world's best herbal intestinal cleansing program. Contains InulinA Prebiotic soluble dietary fiber that aids, enhances and feeds the lactobacilli and bifidobacteria, the probiotic intestinal microflora. Produces short chain fatty acids which inhibit the growth of disease causing bacteria, used by the liver for energy production, and has cancer preventing properties within the intestine. Improves fat metabolism that helps lower LDL cholesterol levels and confer additional cardio-protection. Increases the systemic absorption of calcium and magnesium. Recognized by the USFDA as a food ingredient (not an additive) and regarded as safe for human consumption. This new formulation yields a manifold increase of lactobacteria-enhancing activity over earlier products, while providing improved taste and multiple other proven healthful benefits that give even greater assurance that you need not cleanse the intestines first and reimplant lactobacteria later.

while still providing the lubrication and absorptive effects needed to sweep loosened mucoid matter from the system. You may now cleanse and promote an abundant implantation of lactobacteria at the same time! The Holistic Horizons Intestinal Bulking Agent III and Intestinal Cleansing Formula tablets should both be used together to achieve this effect, as both contain required complementary ingredients to provide a synergistic benefit.. This product is a blend of premium quality powdered herbs taken one to four times daily with liquid throughout the cleansing period. Its primary herbal constituent, psyllium, is supplemented by inulin, dandelion, and other palliative herbs to enhance effectiveness while acting gently on the system. (2+ bottles required for each month of cleansing)

Which Bulking Agent is For You? Because of its superior lactobacteria-enhancing activity, it is desirable to use the Intestinal Bulking Agent II or III rather than the Special Formula Bulking Agent whenever doing so is easily tolerated in all respects. The difference between the two products may not immediately be noticeable because it takes several weeks for the lactobacteria to build up to a point where the difference may be seen. In fact, the Special Formula Bulking Agent actually produces a little more bulk, and may therefore seem more effective upon initial use, but in the long run, the Intestinal Bulking Agent II or III will usually be more beneficial for most people. There are, however many individuals who prefer to use the Special Formula Bulking Agent. Some prefer its lesser diuretic activity. Some simply prefer its different taste. Mostly though, it is used by those with severe infestations of candida parasitic yeast. Rapid growth of beneficial bacteria causes a rapid die off of candida resulting in die-off cleansing reactions. These may take the form of headaches, nausea, constipation, gas, mucus discharge, and other symptoms. If you have or suspect you have candida, you may want to start the program with the Special Formula Bulking Agent. After six to eight weeks, begin using a mixture which is 10% to 25% Intestinal Bulking Agent II or III and the rest Special Formula. Then, every few days, increase the proportion of Intestinal Bulking Agent II or III at a rate that is easily tolerated until you are using only Intestinal Bulking Agent II or III. Suggested Use: Stir dose into a full glass (8 ounces) of liquid and drink immediately. Follow promptly with a second glass of water.

DataSheet:

The Intestinal Bulking Agent III Sale Price: \$12.08 - Vitamins or Herbs Should be taken as directed on the bottle.
