General Information and datasheet (Trace Minerals Research)

Liquid Glucosamine/Chondroitin/MSM

Liquid Glucosamine/Chondroitin/MSM is a potent formula loaded with nutrients that help to provide nutritional support for joints and connective tissue.†

First, we added 1,500 mg of Glucosamine Sulfate. Glucosamine is a compound found in human joint cartilage and research has shown that supplementation of this nutrient has helped to strengthen normal joint structure.† It has also been successful in helping promote joint comfort, therefore maintaining mobility.†

Second, we added 750 mg of Chondroitin because it works synergistically with Glucosamine to supply cartilage with the vital building blocks it needs to stay supple and healthy.†

Third, we added 1,000 mg of MSM, which is a natural sulfur compound the body critically needs to maintain proper joint lubrication and flexibility for proper mobility.†

And finally, we supercharged our formula with

ConcenTrace® for improved absorption and assimilation.†
ConcenTrace® is an active complex of over 70 ionic trace
minerals and elements found in seawater. For more research and
information on ConcenTrace®, call or visit our website.

We
are so confident you'll love everything about
Glucosamine/Chondroitin/MSM –taste, enhanced mobility and
flexibility—we are willing to back it up with our "Feel the
Difference or Your Money Back!" guarantee, one of the best
satisfaction guarantees in the industry.

NEW 32oz. size now
available.
