- Cellular Immune Support
- Supports Intercellular Communication*
- Provides 8 "Essential" Sugars
- With GlycoBerry-8™ and ImmunEnhancer™ AG

NOW® Glyconutrient Complex contains GlycoBerry-8™ and ImmunEnhancer™ AG. GlycoBerry-8™ is a proprietary blend of ingredients that supplies eight immune-supporting glyconutrients (sugars) from CoffeeBerry™ (the whole fruit of the Coffee plant) and other natural substances. Glyconutrients are essential components of cell signaling molecules that are involved in a multitude of intercellular communication functions, and play an especially important role in immune response. ImmunEnhancer™ AG is a polysaccharide from Larch called Arabinogalactan. Scientific studies have shown that Arabinogalactan can support a healthy immune system through its effects on NK Cells. A strong, responsive immune system is the foundation of good health. Use NOW® Glyconutrient Complex with GlycoBerry-8™ to help support healthy immune function seasonally and throughout the year.*
