## General Information and datasheet (PREMIER LABS)

SEA HARMONY™

A balanced blend of organic Sea Vegetables  
and  
Alfalfa with Magnesium

Why Obesity and Disease Are On the  
Increase

Since the 1950's America's food supply has become increasingly deficient in vital health sustaining nutrients due to commercial farming, food processing, and acid rain from pollution leeching the soil of minerals with the runoff going into the rivers, lakes, streams, and oceans.

Since people cannot get the nutrition they need in their food this creates a state of overeating, never being satisfied or full because the body cannot get the nutrients required for its survival. Researchers have also found that many people are deficient in iodine because it is lacking in our food and is blocked by chemicals called halides such as fluorine in water and dental products, chlorine in water, and bromine found in disinfectants, pesticides, and dough conditioners for bread.

The combination of reduced nutritional content of our food supply, its processing, and reduced organic iodine with the overindulgence in processed and fast-food is contributing to more people being overweight, obese, and disease

stricken.

#### Taking Vitamin Supplements

While taking vitamin

and mineral supplements is a good idea we have to remember that these only contain just a few of the many hundreds of known and unknown nutrients required by the body each day. Also, many of the ingredients in supplements are synthetic.

#### SEA HARMONY™

contains a balanced blend of organic sea vegetables and alfalfa. While sea vegetables are considered the most nutritious plants on earth, alfalfa, with its roots going 100 feet or more into the earth, is considered the most nutritious plant on land.

A Rich Source of Natural Health Sustaining Nutrients

SEA

HARMONY™ provides easy to absorb minerals such as calcium, magnesium, potassium, manganese, copper, silica, sulphur, boron, chromium, zinc, iron, phosphorus, iodine, selenium and other trace minerals and elements not found in land based plants, vitamins such as A in the form of beta-carotene, C, E, B-complex including B12 and folic acid, essential and non-essential amino acids, several beneficial plant sterol, polyphenols and polysaccharides such as fucoidan which has shown to have anti-tumor, and cardio-protective properties. Organic iodine for healthy thyroid function for improved metabolism resulting in more effective weight loss, blood pressure, and water retention.

#### Nutritional Support

This rich diversity of

nutrients found in SEA HARMONY™ will promote healthy digestion and elimination, support healthy cholesterol levels, pH balance, bone, joint function, skin, hair, nails, cardiovascular function, glands, organs, and immune system, inhibit the uptake of heavy metals, remove toxins and heavy metals, protect against radioactive iodine 131 from nuclear powerplants, and radioactive strontium 90 and cesium 137. Also, the organic iodine will promote healthy thyroid function for improved metabolism and weight control.\*
