## General Information and datasheet (SOURCE NATURALS)

ENADAlert® & ENADA® NADH

### Energy-Rich Coenzyme \* 2.5 mg, 5 mg and 10 mg

ENADAlert is the trademarked name for NADH (10 mg), the reduced form of nicotinamide adenine dinucleotide (NAD), which in turn is the coenzyme form of vitamin B-3 or niacin. NADH is a naturally occurring nutrient for people desiring a stimulant-free energy boost. Quick-acting ENADAlert helps relieve drowsiness, restores alertness and energy, and boosts stamina and endurance. NADH is an energy-rich coenzyme that is essential for the production of ATP, the primary energy carrier in our cells. It is a central component in the energy-producing mechanism in our cells, and is used in glycolysis, the first stage of the process in which the body breaks down glucose to use for energy. The brain, a highly energy-demanding organ, uses more glucose than any other organ. The brain, nerves, muscles and heart require a constant supply of ATP energy in order to function. ENADAlert and ENADA® NADH offer you the only patented, stabilized, absorbable form of NADH available.

#### Supplement Facts for 2.5 mg

Serving Size: 1 tablet

	Amount	%DV
NADH (Reduced B-Nicotinamide Adenine Dinucleotide)	2.5 mg	

**Other Ingredients:** d-mannitol, sodium bicarbonate, microcrystalline cellulose, magnesium stearate and vitamin C (as sodium ascorbate).
