General Information and datasheet (SOURCE NATURALS)

The True Whey™

Premium Protein Powder

The True Whey is a superior source of complete, biologically active, immunity-boosting protein. It is easy to mix and tastes great, a powerful addition to your daily health regimen. The True Whey is a non-denatured whey protein concentrate, produced to maintain the fragile, immune-boosting, and regenerative components naturally present in fresh milk. Highly digestible, whey has one of the highest biological values of any protein source. Traditionally, whey is formed from the liquids that separate from the milk solids in the cheese-making process. Often, the process involves high temperatures and acidic conditions that may denature the nutrients. The True Whey, however, is made from a unique, proprietary process that preserves the nutrients of the whey. In each 10 grams, you receive 8 grams of protein, 900 mg immunoglobulins, 190 mg lactoferrin, 40 mg calcium, 60 mg potassium, and 30 mg phosphorus. The True Whey provides whole protein, not protein isolates. Intact, biologically-active proteins support your immune system, regulate the use of minerals in the body, protect the digestive tract, and protect your body from oxidative stress. The typical American diet is glutted with refined sugars, carbohydrates, and fats which can have a significant impact on your health. To balance these influences and support normal weight, energy levels and overall health, each 10 grams of The True Whey contains 80% protein and only 38 calories, 6% total fat, 3% saturated fat, and 8% carbohydrates. The True Whey is made from milk from contented cows, which are grass fed and never subjected to any growth hormone treatment, chemicals, pesticides, or genetically modified organisms (GMO's).

Supplement Facts

Serving Size: 10 g (1 rounded scoop)

Serving per container 45

	Amount	%DV
