General Information and datasheet (PETER GILLHAM'S NATURAL VITALITY)

Natural Calm Baby Calm from Peter Gillham's Natural Vitality

This one includes smaller amounts of Magnesium with Vitamin C and Stevia.

Baby Calm absorbs instantly and contains magnesium for baby's relaxation, comfort and growth, Vitamin C for immunity, and the nutritious herb stevia for flavoring.

Category: The same great Natural Calm, Formulated especially for babies.

What makes Natural Calm so special over other forms of magnesium supplements is that it is water soluble and assimilates instantly and thoroughly, and works even in cases of highly impaired digestion.

Doctors

.....
and clinics: Natural Calm is used by over 1,000 doctors and health clinics nationwide with great success.

Natural Calm

Baby Calm Ingredients:

Magnesium Citrate, Magnesium Ascorbate,
Stevia.

Each tablespoon contains magnesium
615mg

Comments: No mom should be without Baby Calm for a calm, happy baby.

Natural Calm Baby Calm Usage:

Start

with 1/4 teaspoon or less daily and gradually increase within two weeks to 1/2 teaspoon. If baby's stool becomes too loose, simply reduce dosage. Can be taken anytime, with or without food.

How to Use Natural Calm Baby Calm?

Preparation: As

you can read from the label, Natural Calm is made as a tea by placing the powder in hot water to dissolve. Cold water can be added at will for instant drinking.

How much Natural Calm

Baby Calm?

It is important to understand that individual needs will vary. Some individuals will need more Natural Calm than others. We recommend that you start with 1 teaspoon daily, and increase your dose up to the point of loose stools. This will be the dose you will need to maintain for regular use.

The

final amount taken could range anywhere from a 1/4 teaspoon to 3-4 teaspoons. This could be taken all at once or split to 2-3 smaller dosages throughout the day.

Diarrhea: If you get

diarrhea, it is a sign that you used too high a dose, and you need to cut it back to the point where the diarrhea does not reappear.

What about kids?

the same applies as before.

Start with a small amount and increase. We recommend starting

with 1/4 a teaspoon and increasing, depending on the kids physical size. If they are 10 years old they can often handle up 1/2 - 1 teaspoon.

High stress and low magnesium = big trouble. Magnesium is a powerful anti-stress mineral and its deficiency is associated with most irritability or stress cases. Use in those stressful times and high tension periods or use regularly to reduce them. Natural Calm is a breakthrough in magnesium supplements and delivers the highest assimilation possible. Magnesium is perhaps the most vital mineral of the body and when there is a deficiency the body will not function properly in many ways.

DataSheet:

The Natural Calm Baby Calm Sale Price: \$15.84 - Vitamins or Herbs Should be taken as directed on the bottle.
